About Dr. Ed Tobenas:

Dr. Ed Tobenas is very passionate about providing quality chiropractic care for over 15 years. Dr. Tobenas completed his undergraduate degree at Florida International University with a Bachelor of Science in Biological Science. He then attended Life University's College of Chiropractic in Marietta, Georgia, and earned his doctorate from Palmer College of Chiropractic West.

Dr. Tobenas utilizes the Gonstead System for patient care where he strongly focuses on the biomechanics of the spine and the body's own mechanical principles to help patients achieve rapid results and functional correction. He is a current member of the Gonstead Clinical Studies Society and lectures throughout Central Florida about the cause and prevention of musculoskeletal injuries. In the past he has also dedicated himself in the chiropractic abroad program where he has participated in the XVII Jornada Quiropractica, Mision El Salvador. This trip helps establish quality chiropractic care to countries that would otherwise never have benefited from chiropractic care.

About Allcare Medical & Injury:

Allcare Medical & Injury is a patient centered multidisciplinary clinic that offers a combination of non-invasive regenerative medical treatments that aid and treat a myriad of conditions, including those that cause chronic pain. Allcare Medical & Injury's goal is to help patients make an educated decision about their healthcare and provide them with the most effective, non-invasive physical medicine treatments for their acute and chronic pain conditions.

Allcare Medical & Injury's commitment to its patients has led to their development of an Orlando based medical clinic that offers state-of-the-art treatment protocols to help conditions causing pain and by utilizing FDA-approved Regenerative Cellular Therapy such as Platelet Rich Plasma (PRP) and Stem Cell, Neuropathy Treatment, Physical Therapy, and Chiropractic Care. With this well-rounded selection of therapeutic medical treatment options, Allcare Medical & Injury can help patients with an extensive list of problems many thought they might have to "just live with."

Aesthetics Treatment:

Regenerative medicine has the ability to help patients feel younger by alleviating joint pain and improving their ability to heal. Because of its rejuvenating properties, many people are using regenerative medicine for aesthetic purposes. Not only does it help heal, it also helps individuals look more youthful, too. We also utilize Facial Fillers, Botox, Wrinkle Reduction, Skin Rejuvenation, Hair Restoration, and Scar Reduction to help patients turn back the hands of time. Also highly successful, regenerative medicine has been used to assist with sexual dysfunction in both male and female.

Ultimately, as a multidisciplinary medical and regenerative cellular therapy clinic in Orlando, Allcare Medical and Injury is proud to provide patients with a non-surgical approach to their pain or injury. They combine the skills of several different doctors and healthcare professionals to help patients get out of pain fast and effectively, therefore offering patients a comprehensive approach for pain relief.
